# **WORK EXPERIENCE**

#### SDE Intern

#### **Dover Corporation**

May 2024 - July 2024

- Developed a robust web application using Next.js with Typescript and Tailwind CSS, automating the addition of new distributors to eliminate the need for manual database modifications
- Implemented advanced optimization techniques like debouncing, server-side rendering, lazy loading, and infinite scrolling to enhance performance and user experience.
- Integrated the frontend with a Node.js backend, and wrote CI/CD pipeline for both backend and frontend using Github Actions to deploy on AWS

### **Fullstack Developer**

#### **Blaze Al**

March 2024 - May 2024

San Francisco (Remote)

- Implemented automated Twitter outreach strategies using Flask and GraphQL, leveraging the Twitter API for automated following and direct messaging to enhance engagement using cron-job on AWS Lambda.
- Implemented a Twitter integration flow for Blaze, developed a Chrome extension using JavaScript (Manifest v3) that redirects users to Twitter and securely sends request headers to the backend.
- Designed and integrated a user interface for the sequences page in Next.js and Material UI, seamlessly coordinating user onboarding steps with Flask backend functionality for an optimized user experience.

#### Web3 Developer

#### **Doge Capital**

**M** Oct 2023 - Dec 2023

♥ Dubai, UAE (Remote)

- Developed various decentralized applications for clients utilizing Next.js, Tailwind CSS, Solidity, Hardhat, and Ethers.js while meeting strict deadlines.
- Implemented SEO best practices through meticulous metadata optimization, significantly enhancing the search engine visibility and ranking of existing company websites.

# **TECHNICAL SKILLS**

- Programming Languages C++, Java, Python, HTML, CSS, Javascript, Typescript
- Frameworks & Libraries React.js, Node.js, Next.js, React Native, Flask
- Database Management Tools MySQL, MongoDB, Prisma, DrizzleORM
- Other Tools Websockets, Docker, CICD Pipeline, Github Actions, AWS

# **EDUCATION**

# B.E. Computer Science Engineering Bits Pilani K.K Birla Goa Campus

**#** 2021 − 2025

**♀** Goa, India

12th Std. CBSE - 96.2%

Jawahat Vidya Mandir, Shyamali

**2021** 

Ranchi, Jharkhand

10th Std. CBSE - 95.8%

Jawahat Vidya Mandir, Shyamali

**2019** 

Ranchi, Jharkhand

# **ACHIEVEMENTS**

- Winner, Quark Web Development Hackathon 2024 – BITS Pilani, Goa Campus.
- Regional Topper (Twice), MIMAMSA Goa-Karnataka region, IISER Pune.
- Google Cloud Digital Leader Certified Passed with 90% accuracy.

# **PROJECTS**

#### **Deployment Platform**

- Next.js | PostgreSQL | Prisma | Kafka | AWS
- Designed and developed a dynamic deployment platform utilizing Next.js, empowering users to deploy their websites seamlessly from GitHub repositories onto random subdomains.
- Leveraged AWS ECS to execute build commands, storing resultant websites dist in AWS S3 while utilizing AWS ECR for Docker image distribution, ensuring efficient deployment workflows
- Implemented Kafka for real-time deployment log management, supported by PostgreSQL for persistent storage, and ClickhouseDB for streamlined data consumption, enhancing platform performance and scalability.

#### **Al Mock Interviewer**

- Next.js | PostgreSQL | DrizzleORM | Gemini
- Developed a full-stack AI real-time mock interviewer application using Next.js and Gemini API with frontend design optimized with Tailwind CSS and Shadon UI
- Implemented secure authentication via Clerk and employed PostgreSQL and DrizzleORM for efficient data storage, facilitating immediate feedback at interview conclusion.
- Integrated video and microphone functionalities to enable Al-driven real-time assessment, empowering users to record responses and revisit past interviews for further engagement.
